## **Introduction**

Congratulations on the purchase of your new CHAUVET lighting effect. We are confident you will enjoy many trouble-free hours with this unit. To assist with the care and use of the product, we have prepared this short guide.

### **ON BACK**

- Color Mode
- Linking Connector
- 12VAC Power Connector
- ON / OFF Switch
- Linking Connector

## **Operation**

This lighting effect has been designed to function on a mains power supply of either 120V~60Hz or 230V~50Hz and has been supplied with a suitable power adapter for use with your local voltage. Check the label on the adapter for the correct voltage. Simply connect the COLORcube to the power adapter and plug in. When connected the COLORcube should illuminate.

The COLORcube is an RGB color changing unit. It utilizes long life LED's to illuminate. The four position switch found on the base gives the user a choice of steady color (red, green or blue) or a slow constant changing of color. This will allow the desired ambiance to be created.

The COLORcubes are linkable via the optional LED-QBCON controller. Up to 12 COLORcubes may be linked on one controller. To link the units, remove the power supply from the COLORcube and plug it into the controller. Put the on/off switch into the off position and connect the controller to the COLORcube via the supplied linking cable. In order to add more COLORcubes, simply remove the power supplies from the cube and set the switch to OFF. The COLORcubes are then linked via the linking cable. The LED-QBCON will power and control up to a total of 12 COLORcubes.

## **Installation / Mounting**

The COLORcube has been designed to either sit upright, be wall mounted or hung. To hang simply attach a chain to the hanging ring on the base of the unit.

The COLORcube may also be wall mounted. Place two screws into the wall being certain that they align with the keyholes on the base. The COLORcube is then simply placed onto the screws.

## **Cleaning**

The Body of the unit may be cleaned with a soft damp cloth. We recommend that a qualified technician carry out internal cleaning only.

## **Maintenance & Servicing**

There are no user servicable parts inside. Contact CHAUVET for servicing.

## **Troubleshooting**

- If the unit does not illuminate - check that main power supply is 'on' and that the unit is properly connected to the power adapter.
- If the unit does not illuminate and they are linked - check that the linking cables are properly installed.
- If after trying this solution, you still have a problem contact CHAUVET.
