STEP 3:

SCBPAR - CHAUVET PARSYSTEM TRAVEL BAG

STEP 4:

The par lights (attached to hanging bar) may now be loaded into the case.
Controller equipment may also be placed in between the individual par cans.

Note: Swing the bar forward in order to:

1. open up space for stand bag
2. provide additional support to lid

STEP 5:

Place the loaded light-stand bag on top of the par cans.
To minimize equipment movement during transport, use the straps provided to secure light-stand bag and hanging bar.

PRECAUTIONS:

1. To avoid bag damage, **DO NOT** overload bag beyond the recommended distributed weight.
2. To avoid injuries, **DO NOT** attempt to lift more than your physical abilities.
3. **DO NOT** stack more than 1 loaded Parsystem Travel Bag over another one.
4. This bag is not water tight or water resistant. It can absorb water so please avoid contact with water.
